

# Department of Computer Science and Engineering

## Research Laboratory

To support the learning and practices in the technological area related to computer science, the Department of CSE have well equipped Research Lab with systems of i7 processor, Windows 10 Operating Systems for the development of minor and major projects undertaken during the coursework of research

The lab is dedicated for Research and Development activities in the areas of Data Mining, Machine Learning, Data Analytics, Cloud Computing, and Wireless Sensor Networks and is equipped with various software packages like MATLAB and Open Source software's like NS2, Weka, Rapid Miner etc. The lab is basically used by PhD scholars, post graduate students and final year under graduate students for exploiting their research ideas and also to access online journals

The Ph.D Scholars and PG students have the entire lab at their disposal to carry out their research objectives with high speed internet connectivity.
